AGENDA

8:00 – 8:50 a.m.  Registration/Exhibits
8:50 – 9:00 a.m.  Welcome/Introductions
9:00 – 10:00 a.m.  The Heartbeat of Safety — Managing for Engagement
You do the right things — inspections, committees, training — and yet your employees don’t really buy in, hazards go unreported, and you have occasional spikes in injuries that don’t seem to make sense. Involved and motivated employees are the heartbeat of a good safety program, but many traditional safety processes actually reduce employee engagement. Learn ways to communicate, manage and respond to incidents in more positive ways that will foster engagement and bring your program back to life.  
Tom Slattery, CSP, ARM, Corporate Director of Safety & Risk Management, Raven Industries, Sioux Falls

10:00 – 10:30 a.m.  | Break/Exhibits
10:30 – 11:30 a.m.  OSHA Update
This session will address inspection programs in general industry as well as construction, including trenching, excavation and falls. Learn how to protect yourself and your employees from these serious hazards. Statistics on current inspection activities will be shared as well as information regarding the type of fatalities and serious injuries OSHA is seeing statewide. Also, attendees will learn more about the alliance agreement between the SDSC and OSHA in South Dakota.  
Sheila Stanley, Area Director, OSHA Sioux Falls Area Office

11:30 a.m. – 12:30 p.m.  Lunch/Exhibits

12:30 – 1:30 p.m.  Incident Investigation
The goal of this session is to help you better determine the root cause of an incident. We will discuss how to build an incident investigation team, conduct a fact-finding investigation, and implement corrective actions in a manner that looks past placing blame squarely on the individual but instead focuses on the failures of our safety management systems.  
Jeremy Roland, Manager, Occupational Safety and Health, South Dakota Safety Council, Sioux Falls

1:30 – 2:00 p.m.  | Break/Exhibits
2:00 – 3:00 p.m.  Staying Safe Within Your Environment
This session is designed to provide information regarding personal safety in an uncertain world. It is not a self-defense course, but rather focuses on how to use your mind and senses to engage in situational awareness, identify potential indicators of danger, and react in an appropriate manner to avoid victimization.  
Christopher Grant, Captain (retired), Rapid City Police Department

3:00 – 4:00 p.m.  Arc Flash — The NFPA 70E Standard and Your Electrical Maintenance
Hundreds of deaths and thousands of injuries can be avoided each year by following the NFPA 70E: Standard for Electrical Safety in the Workplace. Be prepared by arming yourself with the knowledge of the types of electrical hazards and the effects of electrical shock and flash. This session will identify the need for electrical safety as well as electrical maintenance and safety programs. Attendees will learn about arc flash hazard risk assessment, personal protective equipment (PPE) and shock and arc flash approach boundaries. Reduce your liability concerns while establishing a culture of safe work practices among employees after attending this session.  
Joe Schommer, Business Development Manager, RESA Power Service, Blaine, MN
